

Congratulations Congratulations

## Kimberly M. Frazier

Kimberly Frazier is currently completing her Junior year at the University of Wisconsin – LaCrosse, majoring in Education. Kimberly continues to excel in college, having received only one grade lower than an ‘A’ since enrolling, and carrying an overall cumulative GPA of 3.98. Her concentration as an Education major is grades one through nine with a minor in General Science.

In her personal essay, Kimberly said that she has “a passion to teach” and that “Education is key in creating responsive and responsible citizens.” She also considers herself an advocate for children, particularly those who are mired in poverty through no fault of their own. She works part-time with the LaCrosse Public School District as a tutor working with disadvantaged students.

At UW – LaCrosse, Kimberly volunteers in the school’s Multicultural Student Services Office helping Hmong students with their homework and acting as a mentor. She is also Secretary and fundraising chair of the school’s Circle K Club (the college branch of Kiwanis International) and has performed over 100 hours of service this year with the group at local nursing homes, the Children’s Museum, blood drives, and the Salvation Army among others. Kimberly performs as a member of the Screaming Eagles Marching Band (saxophone and clarinet), plays intramural tennis and soccer, is a member of Kappa Delta Pi, and a member of the Science Academic Team.

In the community, Kimberly has given additional volunteer time working hurricane relief in New Orleans with the United Way, and as a volunteer soccer coach during her summer breaks. Her college academic honors include Dean’s List, AP Scholar, AP Calculus Student of the Year, and AP Physics Student of the Year. She is also a National Honor Society Alumnus.

Kimberly is the daughter of Daniel and Renee Frazier of Green Bay, Wisconsin. Daniel works as a warehouse driver at branch #1476 in Davies/Appleton, Wisconsin and has been employed with Ferguson Enterprises for three years.

***Congratulations and best wishes for the future, Kimberly Frazier!***
